

## #29 Blend mode

**Step 1:** Make sure you add both images into the same layer panel.

*This type of blending is good when you want to use a textured background.*

**Step 2:** Select the person layer and change the blend mode to Hard Light.

**Step 3:** The example below has been changed to Hard Light.

*Have a play around with the different modes, some will not look right but it depends on the images you choose to blend together.*

### Guidance

This tool is available in older versions of Photoshop and Photopea.
